Document Purpose:

The purpose of this documentation is to give a description and explain the preconditions, flow of events, postconditions, relationships with other use-cases and special requirements of Use-Case 3.1 Delete Task from Schedule found in the use-case model of the Task Scheduling System.

Target Audience:

Evaluators and Users

Revision Control

History Revision:

Revision Date	***Person Responsible***	***Version Number***	***Modification***
9/28/16	Sharleen Joy Y. Go	1.0	Initial Document.

Use-Case Name: 3.1 Delete Task from Schedule

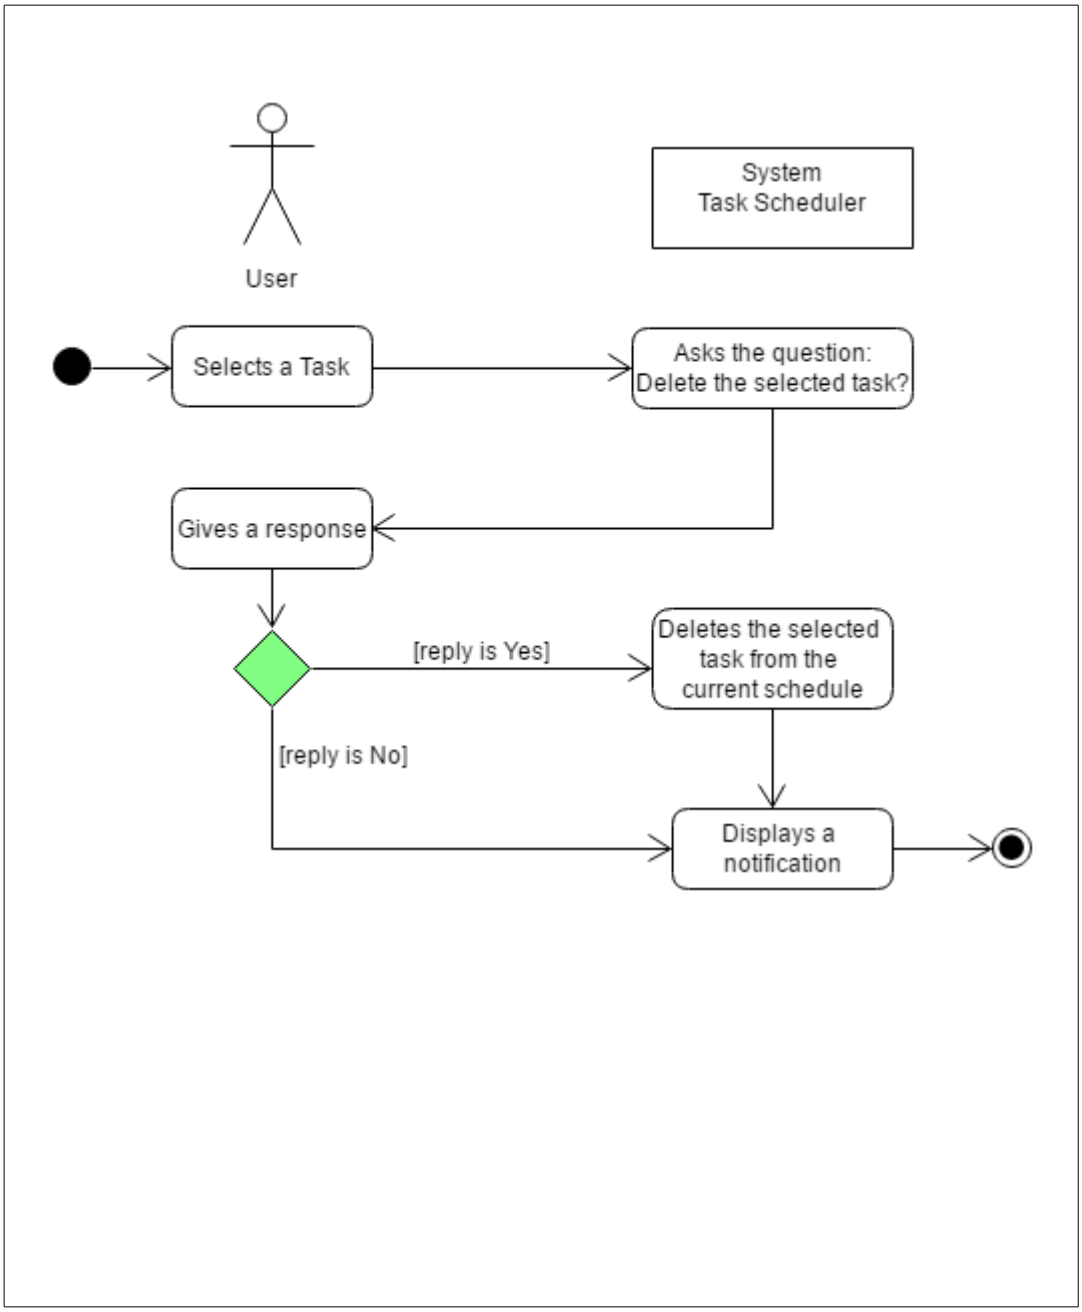
Description: The user actor may delete any task from the current schedule through this use-case. After the selected task is deleted, the resulting schedule is exactly the same as the old one except for the absence of the deleted task.

Preconditions: The task to be deleted must exist in the current schedule.

Flow of Events:

Scenario Name	***Description***
Scenario 1 (Basic Flow) A task was deleted from the current schedule.	1. User selects a task from the current schedule. 2. The task scheduling system asks the question: “Delete the selected task?” 3. User gives a response. 4. If user replies yes, the selected task will be deleted from the current schedule. 5. The task scheduling system displays a message to inform the user that the said task had been deleted.
Scenario 2 No task was deleted from the current schedule.	1. User selects a task from the current schedule. 2. The task scheduling system asks the question: “Delete the selected task?” 3. User gives a response. 4. If user replies no, the selected task will remain in the current schedule. 5. The task scheduling system displays a message to inform the user that no changes were made in the schedule.

Activity Diagram of the Flow of Events:



Postcondition: If a task is deleted, it must no longer be present in the current schedule.

Relationships: NONE

Special Requirements: NONE
