<https://github.com/sharleengo/XCRAM/blob/master/01-Project-Documents/XCRAM%20-%20Use%20Case%20Model.pdf>

**Document Purpose:**

The purpose of this document is to present the use case specification of 'View Task Information' use case.

**Target Audience:**

Evaluators and users.

**Revision Control***History Revision:*

<b>Revision Date</b>	<b>Person Responsible</b>	<b>Version Number</b>	<b>Modification</b>
09/28/16	Robelle Silverio	1.0	Specified purpose, target audience, use case name, use case description, use case precondition, flow of events (scenarios along with its description). Added activity diagram.
9/28/16	Sharleen Joy Go	1.1	Added use case description.

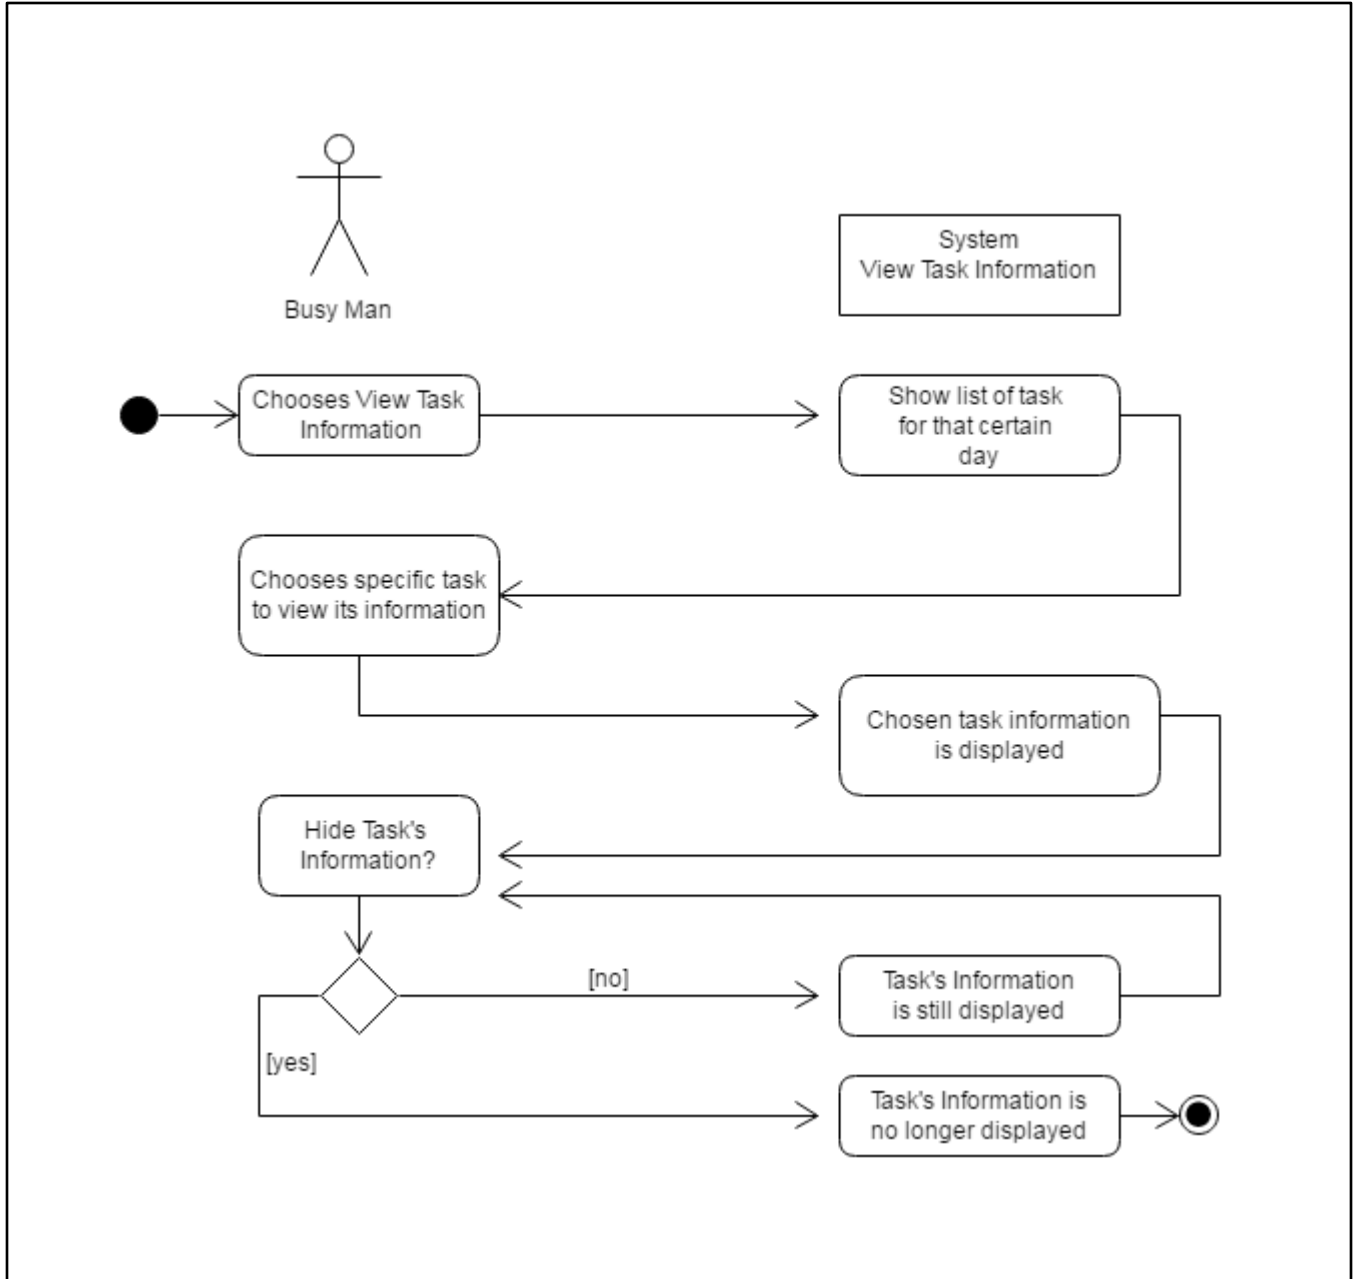

**Use-Case Name:** Use-Case 2.2 View Task Info

**Description:** The Busy Man may view a specific task's information through this use case. The task title, type, start time, end time, duration, priority and constraints will be displayed.

**Preconditions:** At least one task is existing.

**Flow of Events:**

<b>Scenario Name</b>	<b>Description</b>
Scenario 1 (Basic Flow) Busy Man chose to view task's information	1. The Busy Man wished to see the detailed information of a specific task.
Scenario 2 A list of tasks will be shown	1. A list of tasks for that day is shown. Each task is represented by a task title.
Scenario 3 Busy Man will choose one task to be viewed.	1. Only one task can be viewed at a time.
Scenario 4 Specific task's information will be displayed	1. Task's information will be viewed such as: task title, type, start time, end time, duration, and constraints (if indicated by the busy man): priority and preferred time range. 2. Task title is the name of the task added by the user. 3. There are two types of task such as flexible and fix. 4. Start time is when the specific task starts/started. 5. End time is when the specific task ends/ended. 6. Duration is the number of hours/minutes a specific task needed to be completely accomplished. 7. Constraint/s is/are only applicable for flexible task. 8. Priority (if given by the Busy Man; highest priority is 1). 9. Preferred time range is morning/afternoon/evening.
Scenario 5 Busy Man closes 'view task information'	1. 'View Task Information' use case will just end if Busy Man closes 'View Task Information'. 2. If Busy Man closed it, task's information is no longer displayed.

*Activity Diagram of the flow of events:*

*Post Condition:* None

*Relationship:* None

*Special Requirements:* None
