**Document Purpose:**

The purpose of this documentation is to give a description and explain the preconditions, flow of events, postconditions, relationships with other use-cases and special requirements of Use-Case 3.2 Clear Schedule found in the use-case model of the Task Scheduling System.

**Target Audience:**

Evaluators and Users

**Revision Control***History Revision:*

<b>Revision Date</b>	<b>Person Responsible</b>	<b>Version Number</b>	<b>Modification</b>
9/28/16	Sharleen Joy Y. Go	1.0	Initial Document.

**Use-Case Name:** 3.2 Clear Schedule

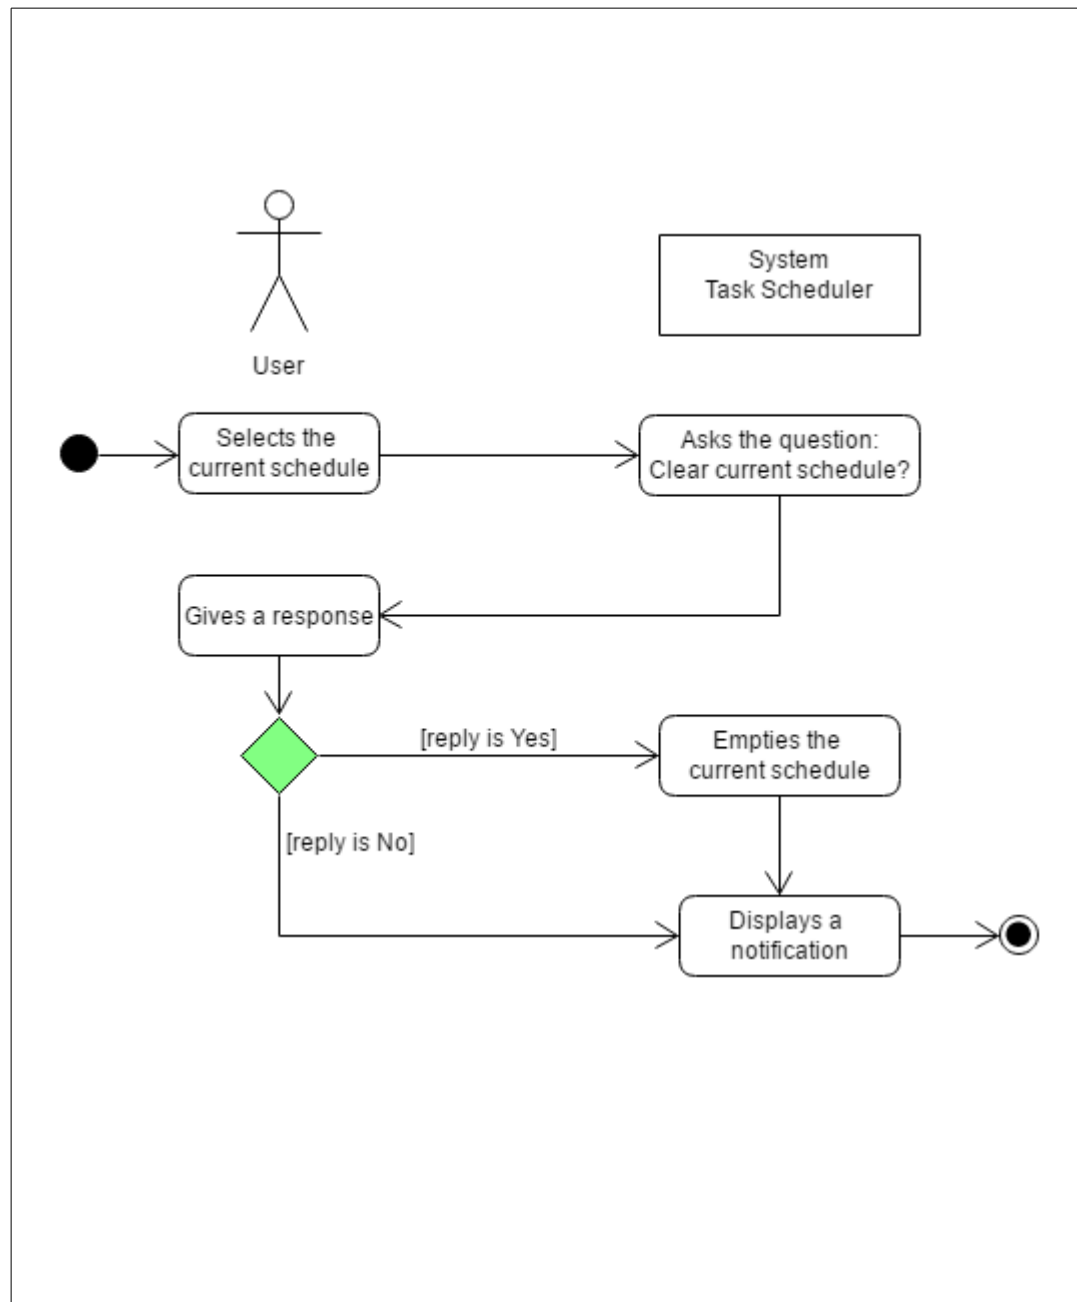

**Description:** If at some point the user wishes to create a completely new schedule, he may delete all the tasks from the current schedule through this use-case.

**Preconditions:** NONE

**Flow of Events:**

<b>Scenario Name</b>	<b>Description</b>
Scenario 1 (Basic Flow) The current schedule is cleared	1. User selects the current schedule. 2. The task scheduling system asks the question: "Clear current schedule?" 3. User gives a response. 4. If user replies yes, the current schedule is emptied. 5. The task scheduling system displays a message to inform the user that the schedule had been cleared.
Scenario 2 The current schedule is not cleared	1. User selects a task from the current schedule. 2. The task scheduling system asks the question: "Clear current schedule?" 3. User gives a response. 4. If user replies no, the schedule is left unchanged 5. The task scheduling system displays a message to inform the user that no changes were made in the schedule.

*Activity Diagram of the Flow of Events:*

*Postcondition:*        The current schedule, if cleared, must be empty: doesn't contain any task.

*Relationships:*        NONE

*Special Requirements:*    NONE
