Document Purpose:

The purpose of this document is to present the use case specification of 'View Current Schedule' use case.

Target Audience:

Evaluators and users.

Revision Control

History Revision:

Revision Date	Person Responsible	Version Number	Modification
09/28/16	Robelle Silverio	1.0	Specified purpose, target audience, use case name, use case precondition, flow of events (scenarios along with its description). Added activity diagram.
09/28/16	Sharlene Joy Go	1.1	Added use case description.
09/28/16	Robelle Silverio	1.2	Edited use case description.

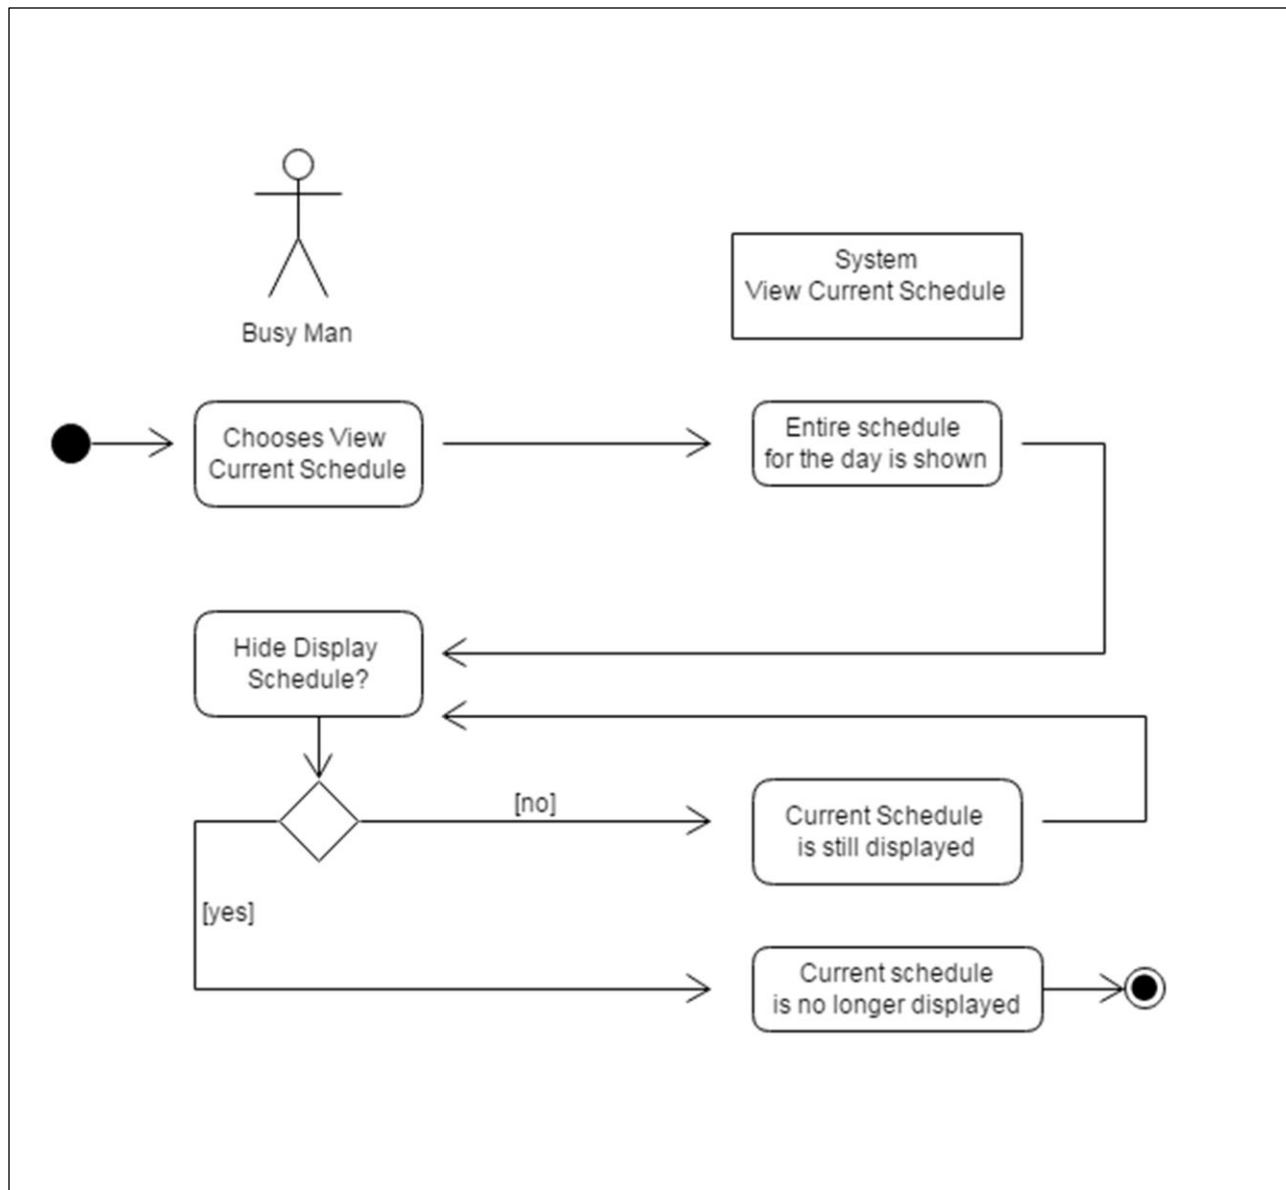

Use-Case Name: Use-Case 2.1 View Current Schedule

Description: This use-case will allow the Busy Man to view the schedule for the entire day that the system has made given all the Busy Man's inputs. Each task's title will appear alongside its allotted time range and they will be sorted in increasing order of time.
It uses military time which starts from 12:00 and ends at 23:59.

Preconditions: Busy Man choses to view current schedule.
At least one task is existing.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) Busy Man chose to view current schedule	1. The Busy Man wished to see his/her entire schedule for the day
Scenario 2 Schedule will be displayed	1. The entire schedule is shown. 2. Each block could be a block with task title (a task for that day) or a free task block (no task assigned) which corresponds with a specific time range. 3. Uses military time. 4. One day means 12:00 to 23:59.
Scenario 3 Busy Man closes display schedule	1. 'View Current Schedule' use case will just end if Busy Man closes 'View Current Schedule'. 2. If Busy Man closed it, the schedule for the entire day is no longer displayed.

Activity Diagram of the flow of events:

Post Condition: None

Relationship: None

Special Requirements: None
