Use-Case Name: 3.0 Delete Task Schedule

Description: The purpose of this use-case is to delete any information that the user had previously entered into the system. This use-case handles all sorts of deletions that the user is allowed to make in the Task Scheduler System.

Preconditions: Each of the three use-cases that extends to this use-case has its own unique preconditions. Those are specified in the use-case specifications of those use-cases.

Flow of Events: Each of the three use-cases that extends to this use-case has its own unique flow of events. Those are specified in the use-case specifications of those use-cases.

Postcondition: Each of the three use-cases that extends to this use-case has its own unique postconditions. Those are specified in the use-case specifications of those use-cases.

Relationships: This use-case requires the functionalities of Use-cases: 3.1 Delete Task from Schedule, 3.2 Clear Schedule and 3.3 Delete Saved Schedule. Those use-cases are elaborated in their respective specifications.
[Refer to the following documents: 3.1 - *Delete Task from Schedule*, 3.2 - *Clear Schedule* and 3.3 - *Delete Saved Schedule*]

Special Requirements: NONE
