### **Unique Reference:**

The documents are stored in the https://github.com/sharleengo/XCRAM

https://github.com/sharleengo/XCRAM/blob/master/02-Requirements-Engineering/3.1%20-%20Delete %20Task%20from%20Schedule.pdf

## **Document Purpose:**

The purpose of this documentation is to give a description and explain the preconditions, flow of events, postconditions, relationships with other use-cases and special requirements of Use-Case 3.1 Delete Task from Schedule found in the use-case model of the Task Scheduling System.

## **Target Audience:**

**Evaluators and Users**

Use-Case Name: 3.1 Delete Task from Schedule

Description: The user actor may delete any task from the current schedule through this use-case.

After the selected task is deleted, the resulting schedule is exactly the same as the

old one except for the absence of the deleted task.

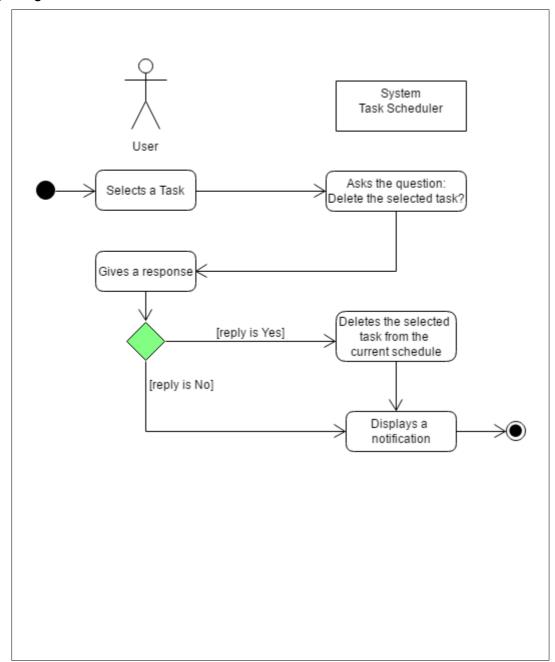

Preconditions: The task to be deleted must exist in the current schedule.

#### Flow of Events:

Scenario Name	Description	
Scenario 1 (Basic Flow)	User selects a task from the current schedule.	
A task was deleted from the current schedule.	2. The task scheduling system asks the question: "Delete the selected task?"	
	3. User gives a response.	
	4. If user replies yes, the selected task will be deleted from the current schedule.	
	5. The task scheduling system displays a message to inform the user that the said task had been deleted.	
Scenario 2	User selects a task from the current schedule.	
No task was deleted from the current schedule.	2. The task scheduling system asks the question: "Delete the selected task?"	
	3. User gives a response.	
	4. If user replies no, the selected task will remain in the current schedule.	
	5. The task scheduling system displays a message to inform the user that no changes were made in the schedule.
