Use-Case Name: 3.3 Delete Saved Schedule

Description: This use-case will allow the user to removed any schedule from the list of saved schedules. The saved schedules' names will be listed. Afterwards, the chosen schedule will be permanently removed from the list and may no longer be viewed or reused.

Preconditions: The schedule to be deleted must exist in the list of saved schedules.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) A schedule was deleted from the list of saved schedules.	1. User selects a schedule from the list of saved schedules. 2. The task scheduling system asks the question: "Delete the selected schedule?" 3. User gives a response. 4. If user replies yes, the selected schedule will be deleted from the list of saved schedules. 5. The task scheduling system displays a message to inform the user that the said schedule had been deleted.
Scenario 2 A schedule was not deleted from the list of saved schedules.	1. User selects a schedule from the list of saved schedules. 2. The task scheduling system asks the question: "Delete the selected schedule?" 3. User gives a response. 4. If user replies no, the selected schedule will be deleted from the list of saved schedules. 5. The task scheduling system displays a message to inform the user that nothing had been removed from the list of saved schedules.

Activity Diagram of the Flow of Events:

Postcondition: a saved schedule, once deleted, must no longer be present in the list of saved schedule that can be accessed through the view saved schedules use-case.

Relationships: NONE

Special Requirements: NONE
